01 Peace in an open work environment

Flexible spaces and open plan offices create connection and promote encounters. But at the same time, they create distraction and stimuli. For example, by colleagues making calls and video calls to external contacts and colleagues working from home. It's more pleasant for them to be able to do this in a space that facilitates this. A place where they can make (video) calls without disturbing their colleagues.

The Ahrend Qabin Collection can create self-contained spaces in an open working environment. Each individual box provides a comfortable, focused workspace where one or more employees can isolate themselves from their surroundings. For more creativity, more focus and more peace.

When you step into a Qabin you get an immediate sense of peace and quiet. The climate inside the box is pleasant, both in terms of acoustics and temperature, allowing you to work inside for longer periods.

02

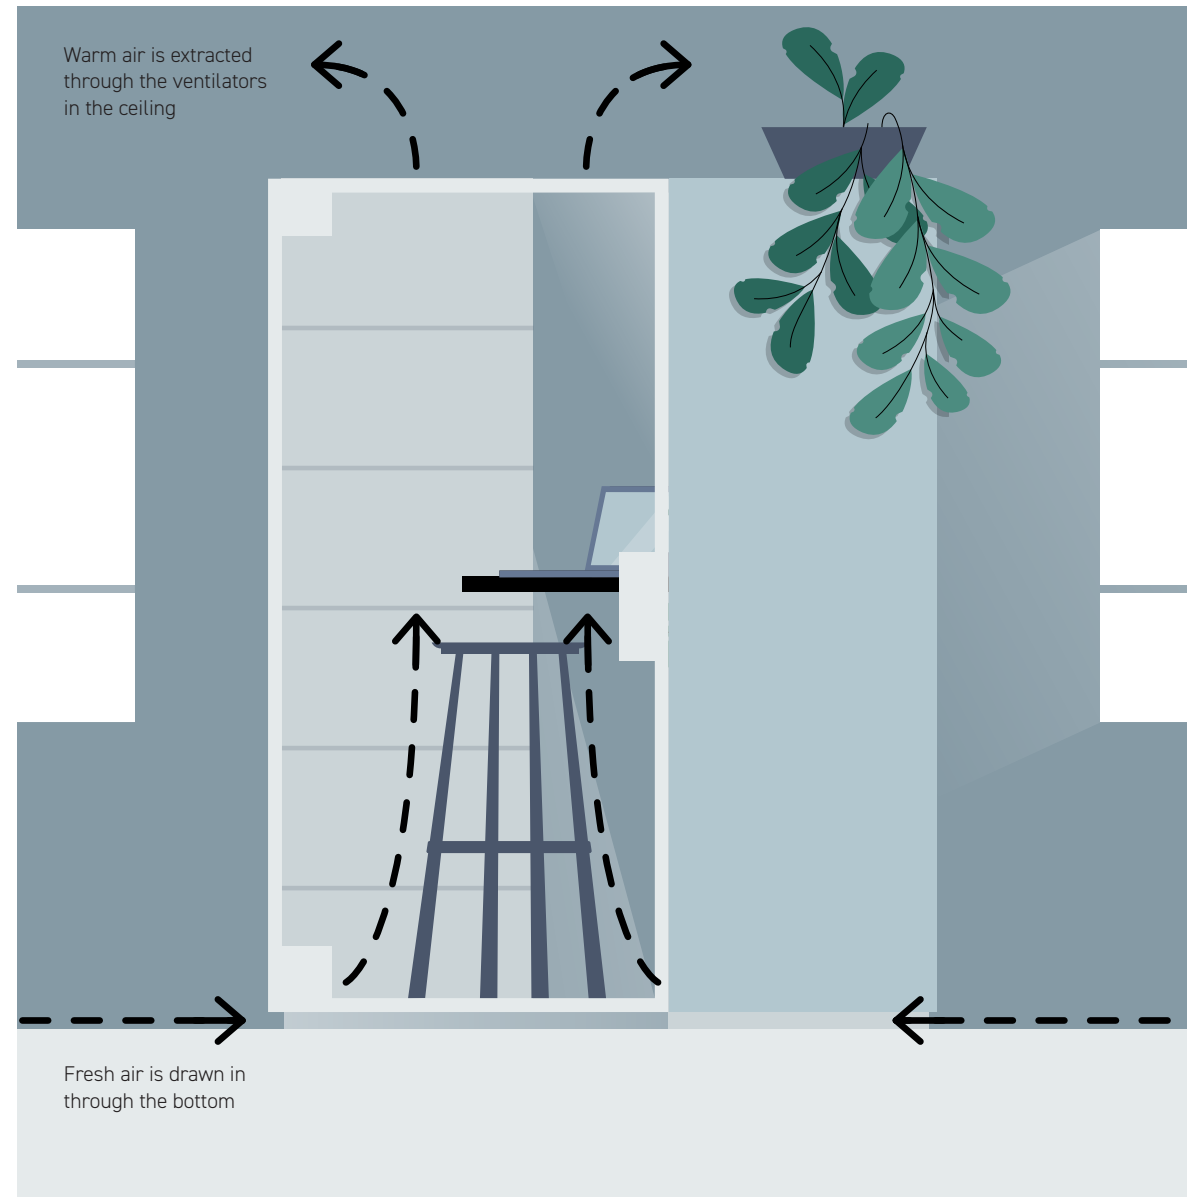

Ventilation

Ahrend has years of experience in designing space-in-space solutions. Using this expertise, Ahrend has developed an innovative ventilation system for the Ahrend Qabin Collection that ensures an optimised internal climate.

Hot air rises, cold air falls. This simple principle was our starting point when developing the ventilation system. This system conducts the air inside the box from the underside upwards via the walls. Warm air is extracted through the ventilators in the ceiling of the box.

Users, and electrical equipment such as laptops, heat up spaces. The incoming air is always cooler, which creates a natural, cooling airflow. The air inside the box is completely refreshed every minute. The climate and temperature inside the box stay pleasant thanks to the continuous inflow of clean, cool air. This enables you to stay focused on your work.

You can use the control panel in the box to adjust the ventilation to your needs.

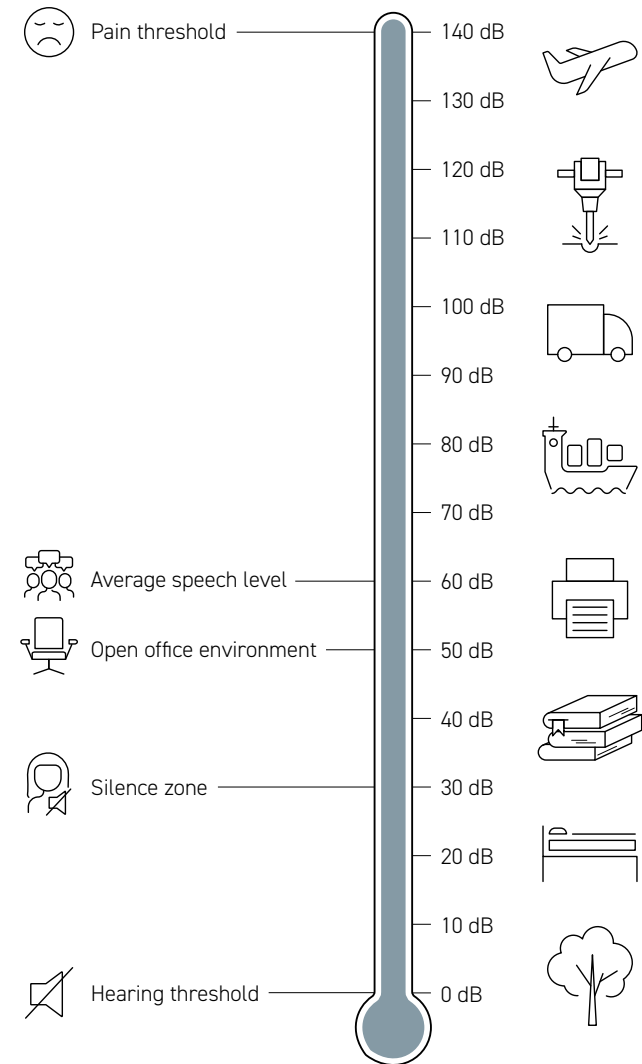

03

Acoustics

In the office, many different activities take place simultaneously, each with its own noise level.

In an open office environment, colleagues' conversations are the main source of noise for workers who are trying to focus on work. This is because the noise level of these conversations (60 dB) is higher than the ambient noise (50 dB) in the open office environment.

Employees can shut themselves off from their surroundings in the Ahrend Qabin and focus on their work. They can also make (video) calls and have meetings in the box without disturbing colleagues.

High level of sound insulation

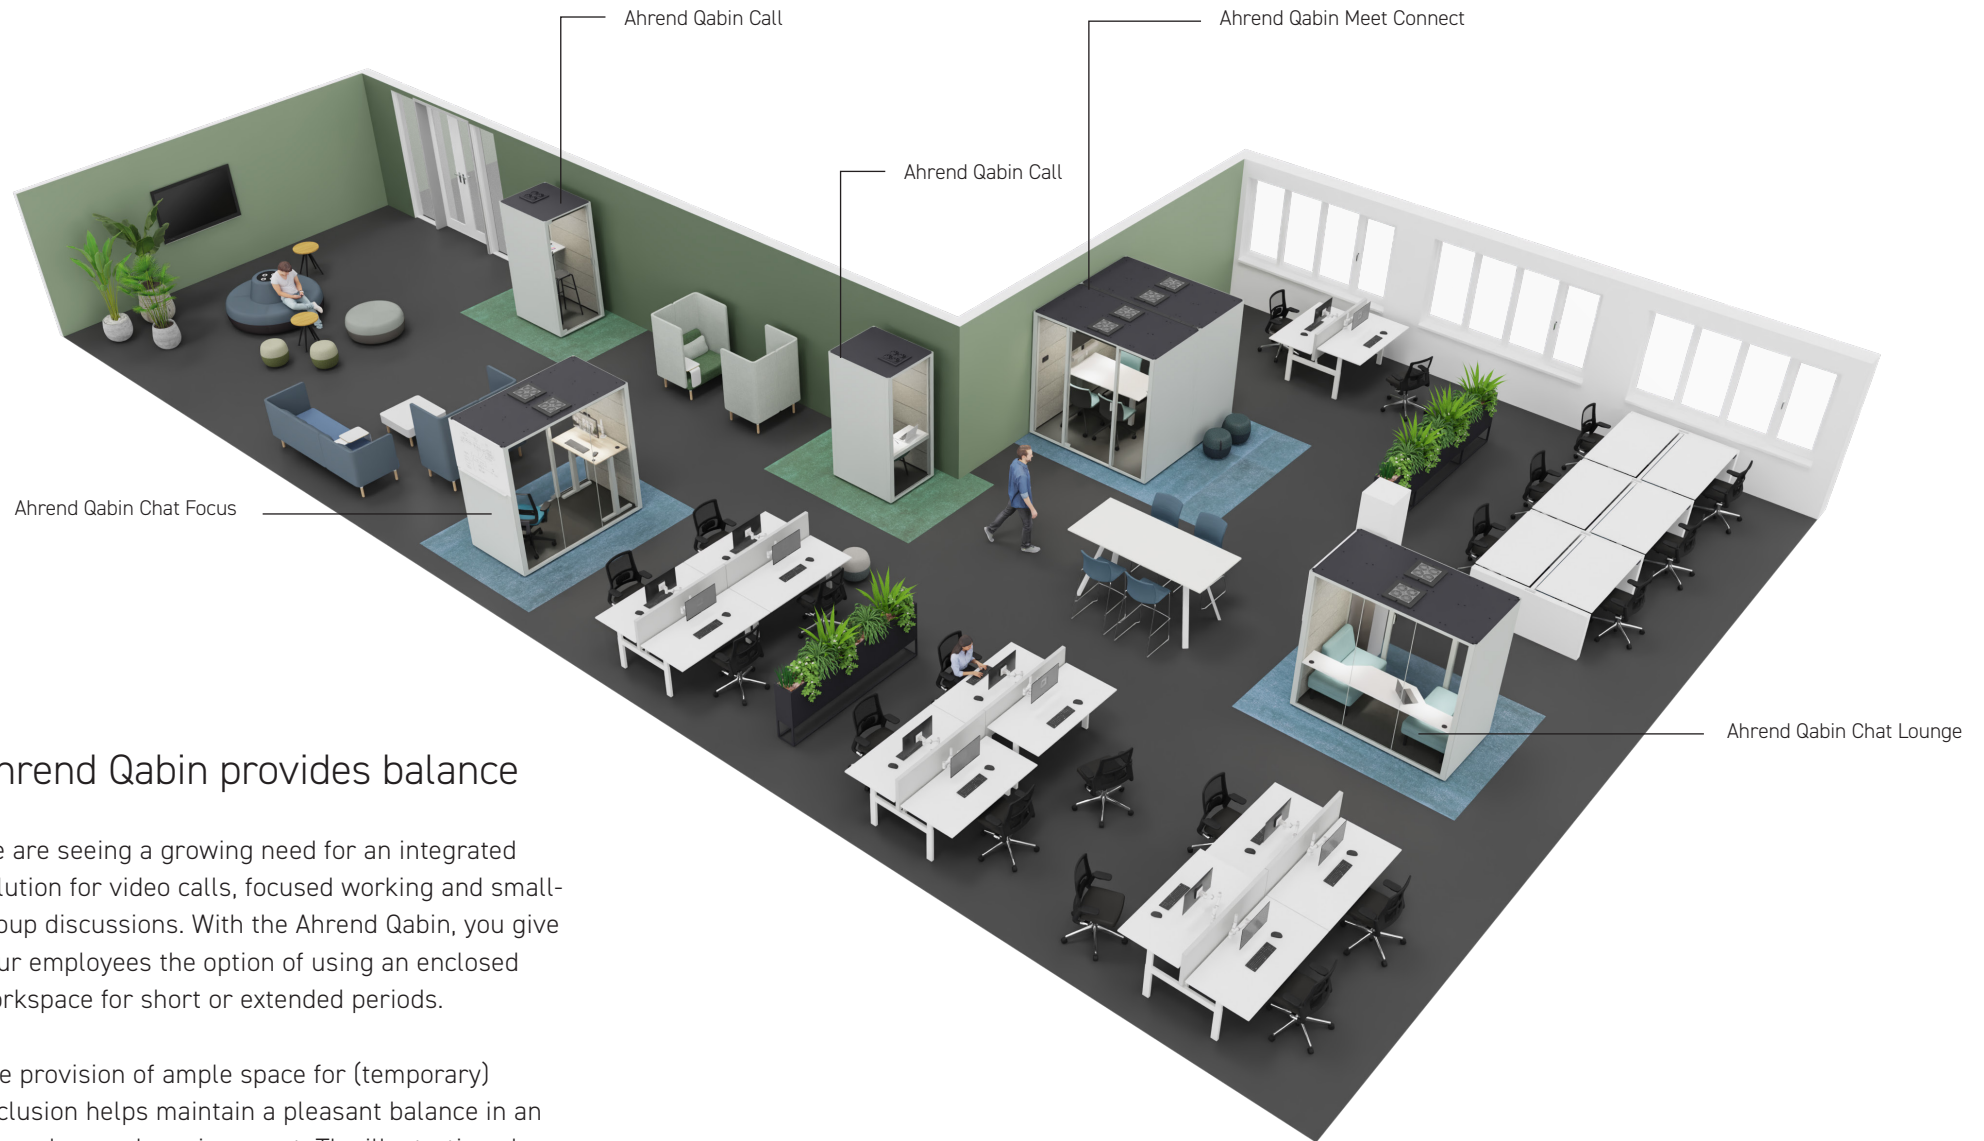

By placing a barrier around the noise, you reduce the speech intelligibility ('noise') of the environment. How much reduction is needed to achieve the desired result is made measurable with the ISO 23351 standard.

Thanks to its high level of sound insulation, the Ahrend Qabin Collection has a total speech intelligibility level of 27.7 dB for the Qabin Chat and 28.1 dB for the Qabin Call, or class B according to the new ISO 23351 standard. Using the Ahrend Qabin reduces the distraction distance by no less than 2/3 (see the diagram).

Does your environment place extra high demands on the sound insulation of the box? The Ahrend Qabin can then be assembled in such a way that it has a total speech intelligibility level of 30.2 dB for the Qabin Chat and 31.1 dB for the Qabin Call and thus complies with ISO 23351 class A.

In addition, the interior of the Ahrend Qabin Collection is fitted with upholstered panels. These prevent echo in the interior space, so that you can hold a pleasant conversation inside the box.

Ahrend Qabin provides balance

We are seeing a growing need for an integrated solution for video calls, focused working and small-group discussions. With the Ahrend Qabin, you give your employees the option of using an enclosed workspace for short or extended periods.

The provision of ample space for (temporary) seclusion helps maintain a pleasant balance in an open-plan work environment. The illustration above shows a good balance between an open work area and enclosed boxes. This works out at 1 box for every 5 employees.

04

Flexibility

The Ahrend Qabin Chat, Meet and Meet XL are modular in structure. They are easy to expand if necessary, for example if the office layout is rearranged or if the number of employees in the workplace increases.

The interiors of the boxes can be adapted to suit the intended activity, thanks to their modular structure. If the need arises in the future, the layout is easily rearranged; for example from an individual workstation to a duo lounge setting, or from a meeting arrangement to a brainstorm setting.

The Ahrend Qabin Collection encourages an active working posture, as you can choose between sitting or standing. This keeps you moving. This makes the boxes ergonomic workstations that support vital and comfortable working.

You can easily attach various accessories to the inside wall of the box, such as a whiteboard, monitor bracket or coat hook. A wall shelf, available in two sizes, can also be attached to the wall. This way you can adjust the box to your wishes. Wheels allow the box to be moved easily, if the layout of the office environment is rearranged, for example.

05

Sustainability

The Ahrend Qabin Collection has been designed to change with the times, making it a sustainable solution. The collection is constructed in such a way that all its components are easy to upgrade or to replace. Furthermore, the interior of the box can be easily adapted to suit changing needs; right where it stands.

All the fastenings are detachable, so that modules and materials are easy to separate, and can be reused within the collection or by our Circular Hub. This avoids wasting materials.

The collection is designed to provide optimum acoustic performance at the lowest possible weight. The lightweight construction has been designed with high material efficiency, which contributes to lower CO₂ emissions, while maintaining the highest level of acoustic performance.

06 Qabin Call

Ahrend Qabin Call is the ideal place to focus on a phone or video call. This box lets you create space for silence in an (open) work environment.

- › There is sufficient space inside for an Ahrend Well chair or Ahrend Swaye stool; you can comfortably use the box for a longer period of time.
- › Ahrend Qabin Call provides a flexible work environment with no major changes needed. Thanks to its compact dimensions, the box fits in anywhere.

07 Qabin Work

Ahrend Qabin Work is ideally suited for working in peace and quiet for long periods of concentrated work and video calls within an open (working) environment.

- › The box is set up as a complete workplace with a sit-stand desk and an Ahrend Well chair, ensuring that prolonged working in the box is well supported.
- › Thanks to its compact size, the Ahrend Qabin Work enables concentrated working in any environment.

Sit-stand desk
68-118 cm

08

Qabin Chat

Ahrend Qabin Chat is the ideal place to isolate yourself from a noisy workplace for a meeting with colleagues or clients, or to concentrate on your work.

The box is available in a range of configurations. The configuration that suits your organisation best depends on what you primarily wish to use the box for. For example, working, video calling or meeting.

- › Ahrend Qabin Chat provides privacy. Do you need to spend a longer period in the box? If so, the glazing allows you to stay in contact with your surroundings.
- › The box meets changing needs within the work environment: interior changes are straightforward.

Qabin Chat Focus

For concentrated work and (video) calls

Interior:

- › Sit-stand desk and Ahrend Remode office chair
- › Can be complemented with floating bench

Qabin Chat Connect

For uninterrupted collaboration and online meetings

Interior:

- › Ahrend Well conference chairs in combination with a low table (in 2 versions)
- › Or Ahrend Swaye stools in combination with a high table (in 2 versions)

Qabin Chat Lounge

For informal meetings and lounging

Interior:

- › Floating benches (with optional shoulder rest) in combination with a low table (in 2 versions)

Sit-stand desk 68-118cm

Table height 76/110 cm

Table height 76 cm

09

Qabin Meet

Ahrend Qabin Meet is particularly suitable for undisturbed meetings, video calls, brainstorming and collaborating in small groups of up to four. The box is available in different configurations. The configuration that suits you best depends on the activity for which the box is used.

- › The various configurations, as well as the option of sitting or standing, make the Qabin Meet ideal for a wide range of activities.
- › Ahrend Qabin Meet meets changing needs within the work environment: interior modifications are straightforward.

Qabin Meet Gather

For undisturbed meetings

Interior:

- › Ahrend Well conference chairs and/or Ahrend Assist poufs in combination with a low table
- › Or Ahrend Swaye stools in combination with a high table

Table height 76/110 cm

Qabin Meet Connect

For uninterrupted collaboration and online meetings

Interior:

- › Ahrend Well conference chairs in combination with a low table
- › Or Ahrend Swaye stools combined with a high table

Table height 76/110 cm

Qabin Meet Brainstorm

For brainstorming sessions and stand-ups

Interior:

- › Ahrend Well conference chairs in combination with a low table
- › Or Ahrend Swaye stools in combination with a high table
- › Electrification module on glass wall

Table height 76/110 cm

Qabin Meet Lounge

For informal meetings and lounging

Interior:

- › Floating benches (with optional shoulder rest) combined with a low table
- › Ahrend Assist pouffes can be added

Qabin Meet Present

For uninterrupted presenting

Interior:

- › Floating benches (with optional shoulder and/or arm rest)
- › Monitor frame for a 43-inch screen

Table height 76 cm

Without table

Specifications

The Ahrend Qabin Collection provides a comfortable and functional space for undisturbed calls, video calls and concentrated work. Standard boxes comes with handy accessories, and various options are available to customise the Ahrend Qabin to your needs.

Standard accessories

The boxes are equipped with a motion sensor and control panel for automatic and effortless control of light and ventilation. Power sockets and USB chargers are available for charging your devices. The occupancy indicator shows the availability of the box. The magnetic closing door ensures a silent closure, allowing you to work undisturbed. A coat hook keeps your workspace tidy. The integrated wheels make the box easy to move.

Options

To fully tailor the Ahrend Qabin to your specific needs, we offer a range of options. Monitor frames, arms and holders ensure the perfect screen arrangement. Interior and exterior whiteboards are ideal for notes and brainstorming sessions. Privacy glass and wooden slats, in natural or black stained oak, offer extra privacy and style. A fabric cover adds a homely touch, and wall shelves offer extra storage space. The Smart PuK charges your devices and gives you insight into workplace occupancy.

With these smart and functional accessories, you transform the Ahrend Qabin into an ideal workplace that perfectly suits your needs and working style.

“A minimalist design that does not impose on the space.”

- Designer Marck Haans

12 Materialisation

The outside and details of the boxes are finished with textured paint; this comes in six colours. On the inside, the Ahrend Qabin features upholstered wall panels; there is a choice of three colours. The tabletops come in five attractive shades.

On the outside, the boxes can be fitted with a *Suit*, a fabric cover, which provides a soft, homely look. The Suit comes in six standard colours. Optional Gabriel and Kvadrat fabrics are available.

Below, we have put together six tone-on-tone colour combinations for your inspiration, but you can also mix and match.

The ceiling is finished in dark grey recycled PET felt. The floor features dark grey recyclable carpet. These materials provide acoustic damping.

13 Designer Marck Haans

Marck Haans (1962), Head of Design at Ahrend and designer of the Ahrend Qabin Collection, has worked at Ahrend since 2010. His designs are characterised by a timeless, minimalist style. In his own words: "Products that don't impose on the space they are used in".

As a student he combined his innate technical skills with great creativity. He continues to do so to this day. He studied Monumental Design at the Royal Academy for Art and Design in Den Bosch from 1982 to 1988, before studying at the Design Academy in Eindhoven. During this period he started work as a designer at Brabantia, where he designed a range of products for the consumer market. He switched to project furniture in 1994. After running his own furniture company and working at Gispen, he joined Ahrend.

His ambition when designing the Ahrend Qabin Collection was to design a product in which design, functionality and circularity come together. The product is designed in such a way that it has a timeless character. The sleek design at first glance is finished down to the last detail. The materials have been chosen so that the design can be applied in different environments. Moreover, the collection is modular. A lot of thought went into this. Exactly the challenge that Marck takes up again and again during the design process.
