

Techo Hyll

Cabinets, lockers, smart
lockers and pedestals

Techo Hyll

Accessible, timeless and versatile. These are the most important features of the Techo Hyll collection. The collection looks great everywhere, due to its sleek appearance and multifunctional nature. The cabinets, lockers, smart lockers and pedestals fit into any environment: in the office, in public spaces and even at home.

**Works
everywhere**

Collection

The collection consists of cabinets, lockers, smart lockers and pedestals that facilitate different ways of storage. They are available in many dimensions and decors.

By choosing uniform colours and materials, the cabinets, lockers, smart lockers and pedestals can be perfectly combined with each other and with other Techo furniture.

Mix &
match

Cabinets

The diversity of the cabinets in the collection facilitates different ways of storage. There is a suitable configuration for each environment.

The cabinets are available without doors, with doors, or with sliding doors. The doors are equipped with a soft-close mechanism and key lock. The door handles have an aluminium finish.

The shelves are adjustable, their position can be adjusted as desired. They are finished with an aluminium strip as standard for strength, but can also be finished without an aluminium strip. Steel shelves are also possible.

The cabinets are equipped with a plinth as standard. For a more homely look, you can opt for legs in ash wood.*

*Only for cabinets with heights 73.5 and 106.3 cm.

The back of the cabinet can be fitted with an upholstered panel. In this way, the cabinets can be used as attractive room dividers which also improves the acoustics of the room. There is a wide choice of upholstery fabric, in line with the upholstery fabric for the panels in the Techo Fount desk and table collection.

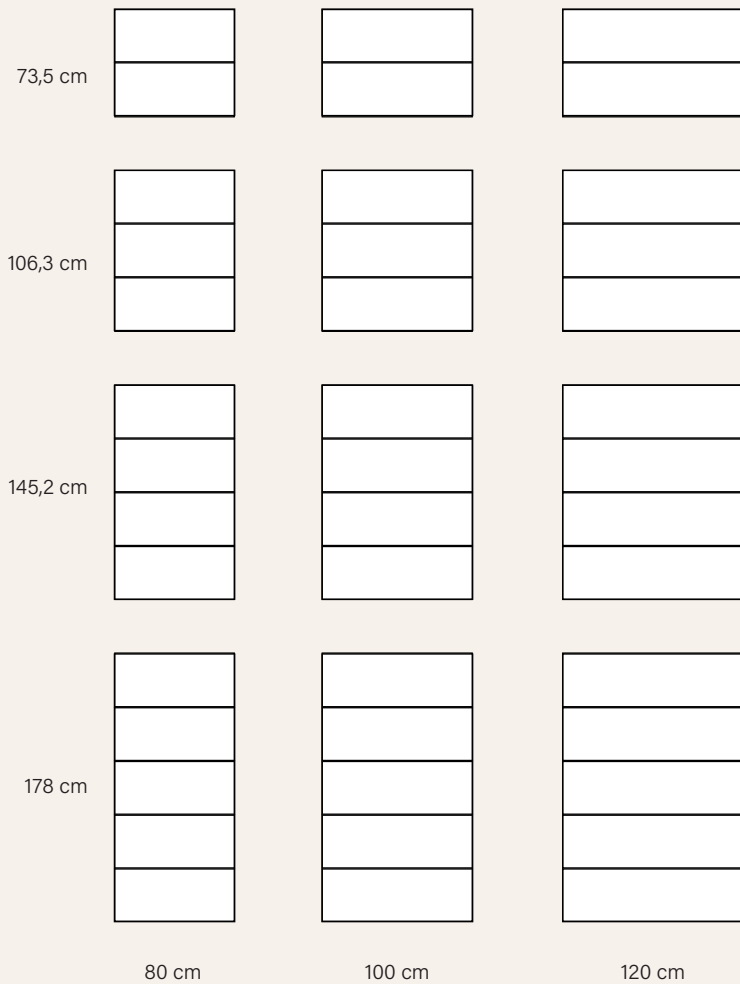

A matching planter can be placed on top of the cabinets. In this way, greenery can be added for a healthy environment. The cabinets with planters can also be used as room dividers.

The top of the cabinets can also be finished with a panel, available in the same decors as the cabinets.

Dimensions

The cabinets are available in the following dimensions.
The depth of the cabinets is 45 cm, or 47 cm including door.

Lockers

Lockers are particularly suitable for the temporary safe storage of personal belongings. They are ideal in a lobby or other public space, but also in the office.

The locker cabinets can be equipped with a fully closed door or a door with opening, for example for mail. The doors are available in three heights. A drawer can be added to the bottom row of the locker cabinet.

The tops and sides of the locker cabinets can be finished with panels, available in the same decors as the doors.

The locker cabinets are standard equipped with a key lock, but other types of locks are also available.

Locks

The locks below are available for the locker cabinets.

Key lock (standard)

Digilock Aspire RFID basic

Burg TwinPad

Lehmann 57

Lehmann 58

Optional cardholder for
Lehmann 57 and 58

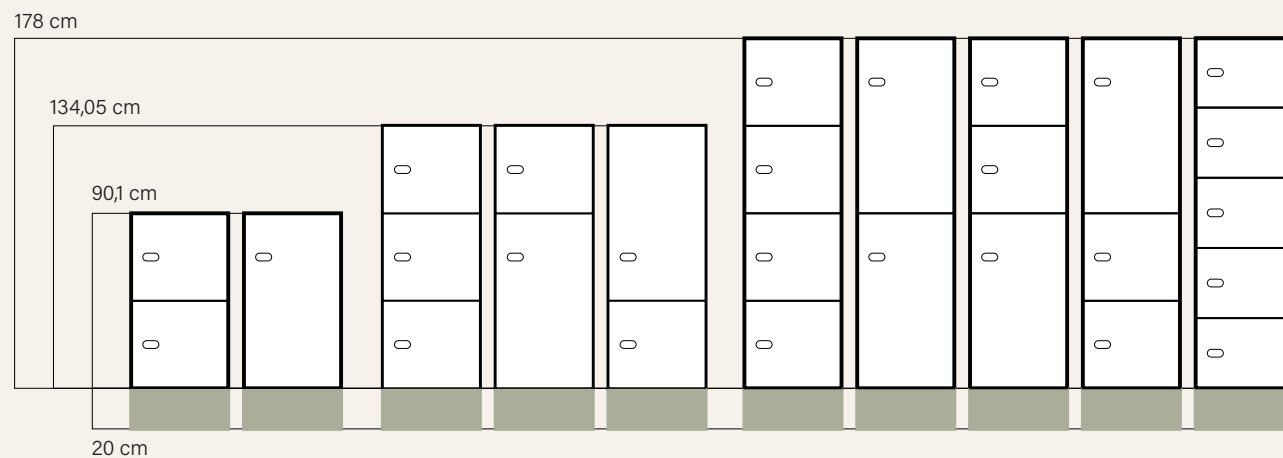

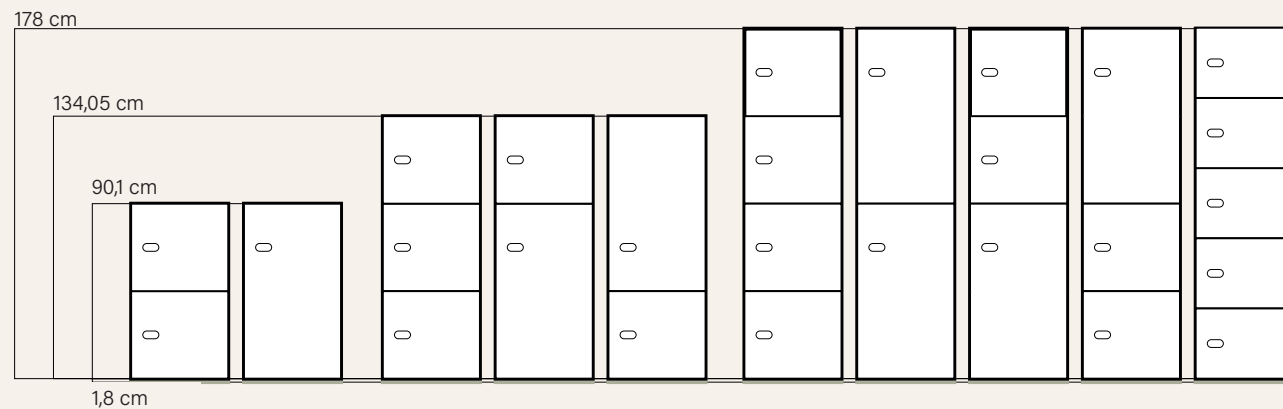

Dimensions

The locker cabinets are available in the following heights.

The standard plinth height is 1.8 cm, a plinth of 20 cm in height is also available.

The width is 40 or 50 cm. The depth is 47 cm, including door.

The images below also show which combinations of doors are possible.

Smart lockers

The Techo Hyll Collection includes both traditional lockers and smart lockers. These offer the same storage space but have a different locking mechanism. Traditional lockers are secured with keys or electronic, code, or RFID locks, most of which are battery-powered. Smart lockers are powered via a cable connection and centrally controlled. They can be accessed via a PIN on the display, an RFID card, or a mobile app. Additionally, smart lockers provide administrators with valuable data on usage and occupancy rates. With Techo Hyll's smart lockers, secure storage becomes even smarter.

The all-in-one locker system offers numerous possibilities for safe temporary storage of valuable items, efficient distribution of company goods such as laptops and phones, and click & collect and pick-up & drop-off options. Smart lockers are therefore particularly suitable for offices, co-working spaces, educational institutions, shops, (hotel) lobbies, gyms, and public spaces. Thanks to their advanced technology and sleek design, they fit into any modern (work) environment.

Configurations

The smart lockers consist of individual column cabinets. These come in two heights and can be combined as desired, even into a complete locker wall. Various configurations are available for different usage situations.

The column cabinets are divided into compartments with doors available in four sizes:

- XS: for small items such as laptops, documents, and small packages
- S: for small to medium-sized items such as handbags, backpacks, and packages*
- M: for larger items such as a motorcycle helmet
- L: for large items such as bags and suitcases

*Only available for column cabinets 188.2 cm high.

For a sleek finish, panels for the sides and top are available. For freestanding cabinets, panels for the back are also available.

The cabinets can be supplemented with decorative elements:

- Open column cabinet
- Open insert box (compartment size M)
- Open top box
- Plant box

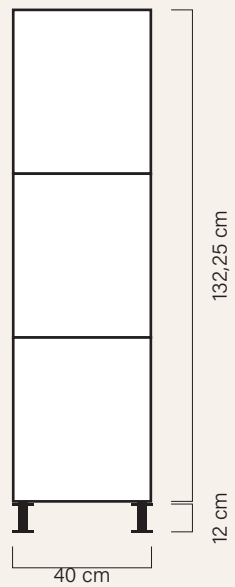

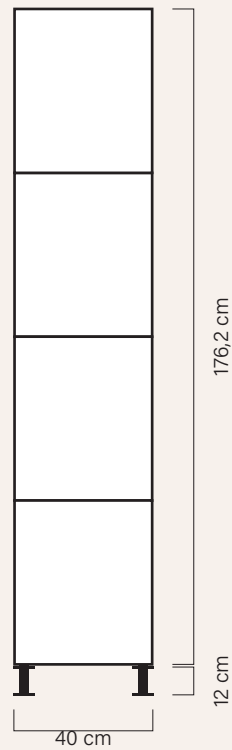

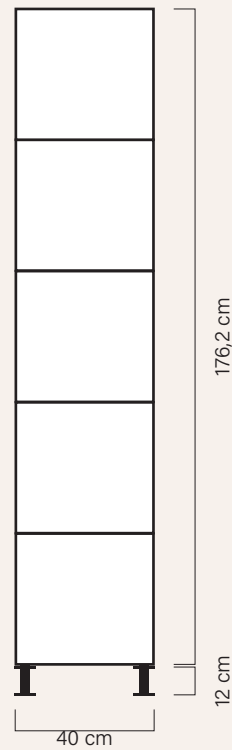

XS

L

3 doors**4 doors****5 doors**

Dimensions

The column cabinets come in two heights: 144.25 and 188.2 cm. The height of the plinth is 12 cm. The width of the cabinets is 40 cm. The depth is 47 cm, including the door.

For the low version, 2 or 3 compartments are possible. For the high version, 2, 3, 4, or 5. The images on this page show which combinations of compartments are possible.

The front edge of the column cabinet is finished in black, creating sleek design lines and a striking contrast with the white body.

Pedestals

The pedestals provide a stylish and functional storage solution for office supplies and personal items. Their design perfectly matches the sleek and modern look of the cabinets, lockers and smart lockers from the Techo Hyll Collection.

The pedestals are available in two configurations, 2+1 and 3+1, with the top drawer featuring a convenient pen tray. The bottom drawer of the 2+1 variant is suitable for A4 hanging files.

All drawers come standard with a soft-close mechanism for quiet and smooth closing. The drawers can be extended up to 80% and have a load capacity of 25 kg per drawer, making them suitable for storing heavier items. For a safe working environment, an anti-tilt mechanism is built in, allowing only one drawer to open at a time and preventing tipping.

The pedestals are equipped with a key lock as standard, providing extra security and peace of mind for storing valuable or confidential items.

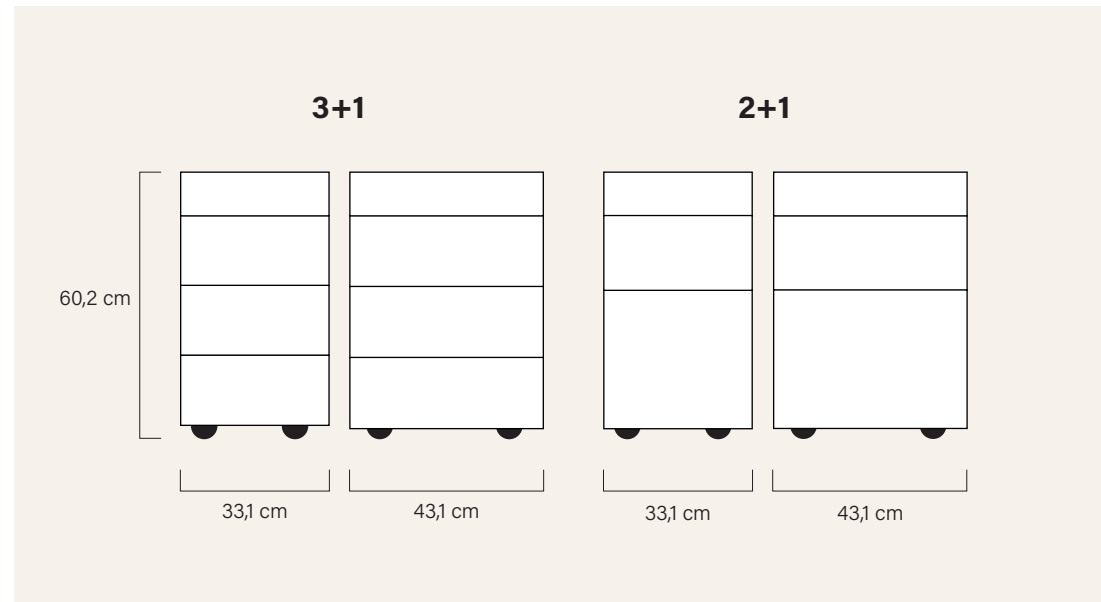

Optionally, the pedestals can be equipped with a seat cushion, making them suitable for short meetings in the workplace. The upholstery of the cushions aligns with that of the panels of the cabinets and the panels of the Techo Fount desks and tables.

Dimensions

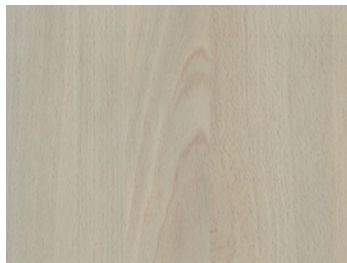

The Techo Hyll pedestals are available in two widths: 331 and 431 mm. Both models have a depth of 600 mm and a height of 602 mm (including castors).

Materials

By choosing uniform colours and materials, the different types of cabinets, lockers, smart lockers, and pedestals can be perfectly combined with each other and with other Techo furniture in the same space.
