Ahrend Retreat

Ahrend Retreat screens offer an attractive, acoustic solution when it comes to creating standalone partitions between workspaces. These tall, upholstered screens enable responsible co-working in the office. They also improve the acoustics and allow greater privacy in the space.

The screens can be connected around workspaces or positioned anywhere in the available space. In other words, they provide suitable partitioning that allows employees to maintain proper distancing in any workspace.

Fixed configurations

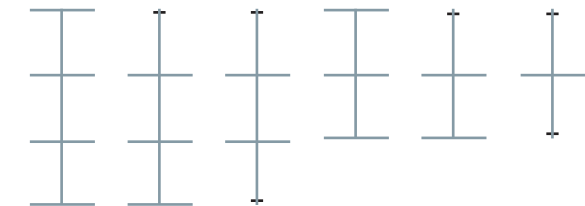

Screens connected in fixed configurations are available for solo, duo, 3-, 4- and 6-person workspaces. They can be placed at the front and sides of workstations. They are suitable for sit-sit and sit-stand workspaces.

The screens are designed to allow adequate finger room to prevent accidents when making height adjustments.

For solo, duo and trio workspaces

For 4- and 6-person workspaces

Standalone screens

The screens can also be positioned anywhere in the office environment to create flexible standalone partitioning for a given space or situation. The screen can be mounted on stable feet or castors.

A matching white board provides the finishing touch. The different screens can be combined to turn any space into an agile working environment.

The screens can be fitted with any of the transparent screens in the Ahrend Clear Collection.

The standalone screens can be placed edge-to-edge or set up with a post between them.

Privacy

Employees are working more frequently from home, where focus is greater and productivity higher. Therefore, they have a growing need for workspaces that offer privacy. Ahrend Retreat screens address this need and also provide a sense of seclusion. To create a temporary sense of privacy we can offer a flexible side panel, which is clamped to the tabletop.

Acoustics

The acoustics of the office environment can be improved by installing the tall, upholstered screens in the Ahrend Retreat range. This helps employees concentrate and improves their productivity.

Sustainability

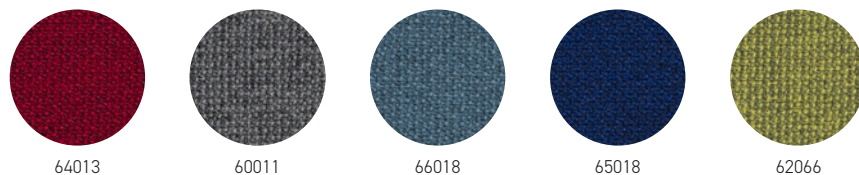

The screens can be upholstered in i-did Felt, which is recycled from used textiles. Another sustainable option is Mica fabric by Gabriel, which is made from 97% recycled post-consumer polyester.

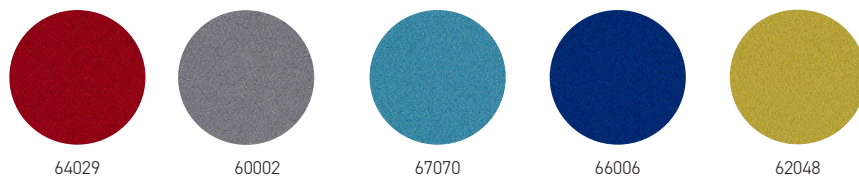

Materials

You can put just about any screen together, thanks to the sheer choice of fabrics and lacquer colours. This means that they will always suit the look and feel of the office environment.

Wheels optional

Cable guide

Adjustable foot

Stable, fixed foot
Aluminium trim

Details

Ahrend Retreat screens have attractive yet functional details. Consider optional cable guides between workspaces and in the side-screens.

Stable, fixed feet to support the freestanding screens. Adjustable feet are fitted to screens connected in fixed configurations to maximise stability.

The edges are fully upholstered or finished with aluminium trim. In the case of i-did Felt, the aluminium trim is not available.

The screens can be fitted with a multifunctional organiser to give a professional touch and a little storage space. Just right for plants and magazines, for instance.

Specifications

Basics

- › Standalone screen
- › Acoustic solution
- › Flexible
- › Wide range

Options

- › Cable guide between workspaces and in side-screens
- › Multifunctional organiser for plants and magazines, etc.
