# 01 Ahrend Ease Collection

More and more research shows that switching between sitting, standing and moving is very healthy. And that if we have to stay seated for a long time we should preferably do so on a good chair. The desk and visitor chairs in the Ahrend Ease Collection encourage movement while sitting.

## The best seating solution for any activity

During a day at the office we switch between various activities: meeting, computer-based work, looking at documents... But focused work at the computer demands a different sort of support to meeting. The Ahrend Ease Collection offers the best seating solutions for diverse activities.

The Ahrend Ease office chair supports you while you work at a desk. This chair is easy to adjust to your personal needs, so that you are always sitting with the correct posture.

The Ahrend Ease visitor chair is light and flexible. Easy to move around and, thanks to the elegant tubular frame, comfortable to sit on during meetings for example.

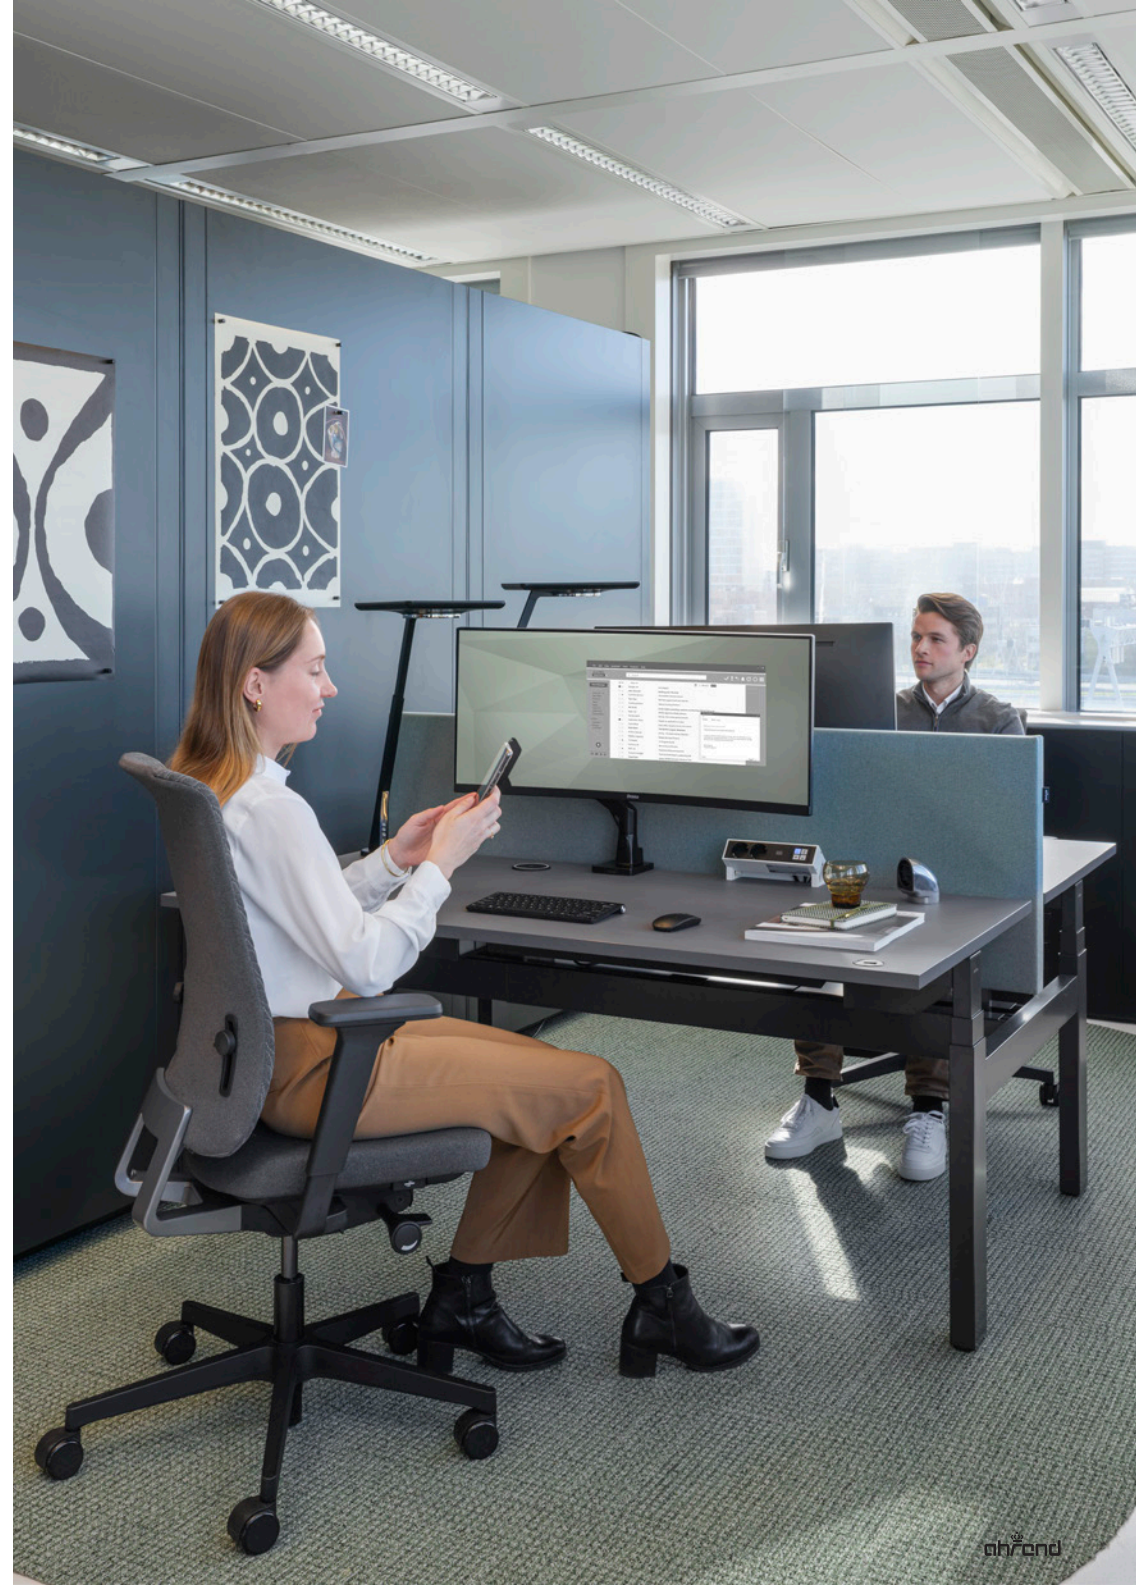

## 02 Ahrend Ease office Chair

The Ahrend Ease office chair is attractive and functional in design, with an optimal ergonomic back rest and a high level of seating comfort.

This office chair is especially suitable for individual adjustment. That is because of the choice of three motion mechanisms and two different armrests, and the abundant adjustment options for lumbar support and seat.

Adjustment is very user-friendly. The buttons situated under the seat make it easy and logical to adjust the chair to suit your body from a seating position. The armrests can also be adjusted quickly and intuitively.

## Movement mechanisms

The Ahrend Ease office chair comes in two versions of the movement mechanism:

- › the synchro-movement mechanism with forward seat inclination for personal adjustment
- › the autofit movement mechanism with fine adjustment: a practical solution when several people share the same office chair

### Synchro-movement mechanism

The synchro-movement mechanism uses two operating levers beneath the seat. The left-hand lever releases the movement mechanism and the forward seat inclination.

This encourages you to move while you are in the seated position. The right-hand lever is used to adjust the height and counter-pressure.

The forward seat inclination produces an active, desk-oriented working posture that provides optimum support for the back. In active sit the seat is inclined, as a result of which you automatically assume the correct sitting posture.

### Autofit movement mechanism

The autofit movement mechanism uses one lever beneath the seat. It is used to adjust the height and release the movement mechanism. The counter-pressure adjusts automatically to your weight. The fine adjustment allows further optimisation of the settings.

3D-arm rests

4D-arm rests

## Working comfortably

Armrests are important for seating comfort. They support the arms, thereby relieving the shoulders and neck muscles. In this way Ahrend Ease helps you relax during a busy working day.

The Ahrend Ease offers a choice between two types of armrests:

### **3D armrests - in accordance with EN 1335**

Adjustable in width, depth and height. With width settings from 38 to 51 cm between the armrests.

### **4D armrests - in accordance with EN 1335 & NPR 1813**

Adjustable in width, depth and height and also with 360° rotation. With width settings from 32,7 to 53,7 cm between the armrests.

## Great fit

The flexible, pivoting back rest ensures a good fit with your back and the correct distribution of pressure. Depending on the desired comfort, the backrest is covered with netweave, upholstered all around, or provided with a knitted cover.

## Optimal support

The Ahrend Ease has a height- and depth-adjustable lumbar support to provide optimum support for the back. The depth can be adjusted to six settings using the twist knobs.

## Adjustable in depth

The upholstered seat has a 12 cm adjustable depth range. The seat slides under the lumbar support to prevent an opening between the seat and back.

## A solution for every floor

The type of floor determines the castors you need for an office chair - hard castors are suitable for soft floors while soft castors are suitable for hard floors.

## Extra-high version

The Ahrend Ease Collection also includes an office chair with an extra-high counter gas spring with a foot ring, height-adjustable from 61 to 91 cm. This office chair is manufactured as standard with an (aluminium) star base on sliders; this makes it safer during use.

## Office chair specifications

### The basics

- › Synchronous or autofit motion mechanism
- › With or without armrests
- › Choice of two armrests:
  - 3D conforms to EN 1335 type A
  - 4D conforms to NPR 1813 and the EN 1335 type Ax
- › Pivoting back rest with black netweave covering
- › Height and depth-adjustable lumbar support
- › Upholstered seat, 12 cm depth-adjustable
- › Black plastic star base

### Options

- › Star base in coated or polished aluminium
- › Star base with hard or soft castors
- › Pivoting back rest fully upholstered, with or without horizontal stitching
- › Extra-high version
- › Wide choice of upholstery from the standard Ahrend range
- › Knitted cover available in 2 colours

## Dimensions

- › Seat heights:
  - 39,3-54,8 cm - Type A, EN 1335
  - 39,1-55,6 cm - Type Ax, EN 1335 and NPR 1813
  - approx. 37-45 cm - lower seat height
  - approx. 49-59 cm - higher seat height
  - approx. 61-91 cm - counter chair with foot ring
- › Sitting depth: 37,0-49,2 cm
- › Seat depth: 41 cm
- › Seat width: 45,7 cm
- › Back rest length: 62,0 cm
- › Back rest width: 45,8 cm

## Certifications

- › EN 1335: 2020 type A & Ax
- › NPR 1813: 2016
- › ANSI/BIFMA X 5.1
- › ANSI/BIFMA M 7.1 e3

# 03

## Ahrend Ease Visitor Chair

Sitting properly during a meeting or consultation is not only comfortable, it makes you more productive. The right support helps you concentrate better.

The Ease visitor chair is designed in such a way that you can sit comfortably both actively and leaning back. The fit of the back rest is always the same; you can also have the chair assembled in a variety of ways. Opt for a 4-leg or sled frame, with or without armrests. The standard seat is made of plastic, but you can also choose greater comfort with an upholstered covering.

Whatever you choose, the slender and light design lends an elegant look to any conference room.

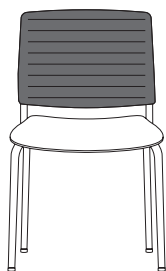

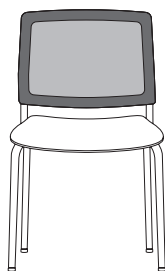

## Choose the chair that suits you

The Ease visitor chair is available in various models.

- › Back with netweave covering
- › Sled frame optionally stackable Frame in chrome
- › Frame fitted with soft runners

### Dimensions

- › Seat height: 48 cm
- › Seat depth: 45 cm
- › Seat width: 45 cm
- › Total width without armrest: 47.5 cm
- › Total width with armrest: 55 cm
- › Total depth: 57 cm
- › Total height: 83.5 cm

## 04 Sustainability

The Ahrend Ease Collection is constructed from modular components that are easily replaced. For example, renewing armrests and upholstery is straightforward, giving the chair a longer life. The back of the office chair is made without screws, staples or glue so that it can be dismantled and reused easily and without the need for tools. The back adapter is made from aluminium, which is easy to recycle.

By choosing the knitted cover, the chair becomes even more sustainable. This cover is custom-knitted, so no fabric is wasted due to cutting loss. The yarn of the cover is made from 100% post-consumer recycled polyester.

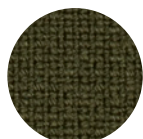

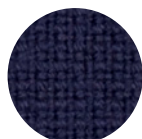

# 05 Materials

With the wide range of finishes and upholstery, matching the Ahrend Ease office chair to the style of the environment is easy. Below is a selection of our fabric collection. See the full overview in our [materialisation document](#).

### **Knitted cover for seat and backrest of office chair**

In addition to the standard upholstery, a custom-knitted cover has been developed for the back and seat of the Ahrend Ease office chair, in collaboration with Gabriel. This seamless, elastic cover with a 3D effect gives the chair a luxurious appearance and extra comfort. By using 100% post-consumer recycled polyester yarn and a knitting technique without cutting waste, the cover is also extra durable.

## 06 Designer

Justus Kolberg designed the beautifully shaped back and adaptor for the Ahrend Ease office chair. His design combines aesthetics and ergonomics with technology. He has cleverly concealed the technological elements to make this chair the right fit for every environment and every user. The Ahrend Ease is an elegant office chair that offers comfort, ease of use and flexibility.

Justus Kolberg entered the world of industrial design in his early twenties. He loves to design products that are in keeping with the human scale and elicit an emotional response.
