01 Stylish resting point in an open-plan working environment

Flexible spaces and open-plan offices promote connection and encourage encounters. At the same time, they create distractions and additional stimuli. For example, because colleagues make (video) calls, have meetings or a chat. The Ahrend Cerene Collection offers a stylish and functional solution.

In these acoustic design boxes, employees can retreat in peace and comfort. Without disturbing colleagues. Each Ahrend Cerene box is a comfortable concentration workplace that promotes creativity, focus and calm.

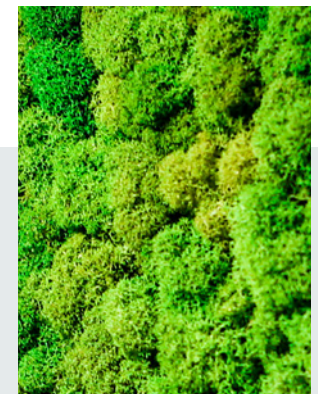

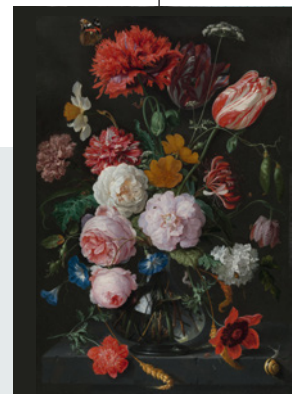

The upholstered rounded outer walls and elegant details make it a stylish element in any open space. The upholstered outer walls also contribute to a pleasant acoustic climate in the environment. And when you step inside the Ahrend Cerene, you experience a sense of luxury, peace and comfort. Inside the box, the climate is pleasant, both in terms of acoustics and temperature. That way, you can spend a longer period of time in it.

02 Design

The Ahrend Cerene not only brings tranquillity, but also gives the open working environment a stylish look. The fabric-covered rounded outer walls, the horizontal lines at the top and bottom and the elegant solid oak door handle make the box a sophisticated design statement.

The rounded outer walls can be finished in various types of upholstery to fit any interior. They can also be fitted with an acoustic panel with oak slats. There is also the option of personalising the outer wall with, for example, an art print, PET felt, moss wall or XL whiteboard.

The inside of the Ahrend Cerene also exudes luxury. For instance, the walls and ceiling are finished in a soothing light grey colour. LED lighting is fitted across the entire width of the ceiling; attractive and functional.

*A stylish design
that exudes luxury.*

03

Ventilation

Ahrend has years of experience in designing space-in-space solutions. Using this expertise, Ahrend has developed an innovative ventilation system for the Ahrend Cerene Collection that ensures an optimised internal climate.

Hot air rises, cold air falls. This simple principle was our starting point when developing the ventilation system. This system conducts the air inside the box from the underside upwards via the walls. Warm air is extracted through the ventilators in the ceiling of the box.

Users, and electrical equipment such as laptops, heat up spaces. The incoming air is always cooler, which creates a natural, cooling airflow. The air inside the box is completely refreshed every minute. The climate and temperature inside the box stay pleasant thanks to the continuous inflow of clean, cool air. This enables you to stay focused on your work.

You can use the control panel in the box to adjust the ventilation to your needs.

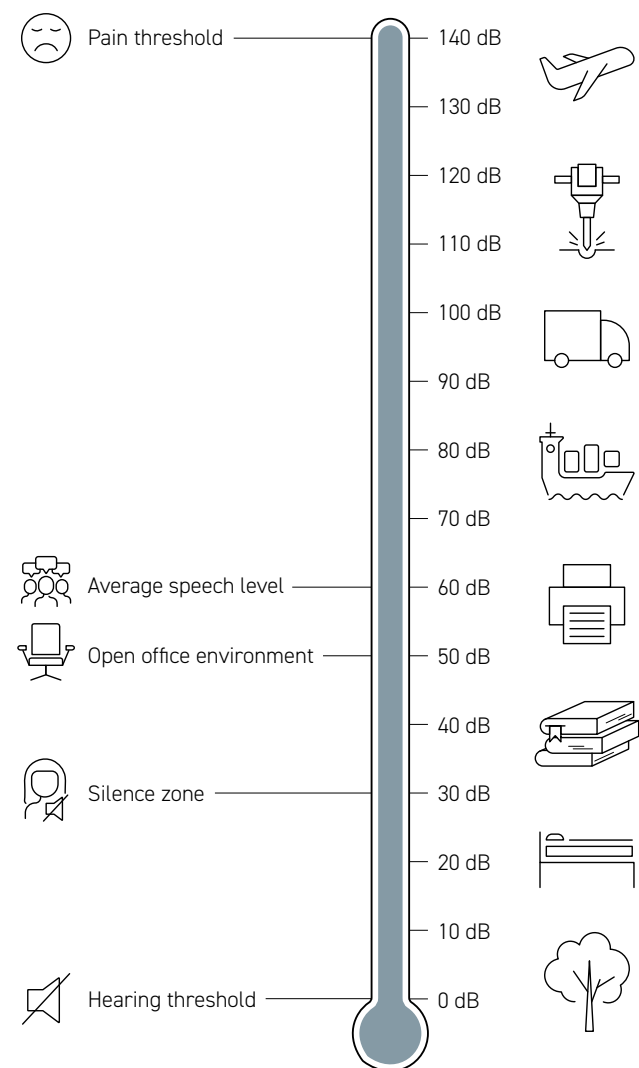

04

Acoustics

In the office, many different activities take place simultaneously, each with its own noise level.

In an open office environment, colleagues' conversations are the main source of noise for workers who are trying to focus on work. This is because the noise level of these conversations (60 dB) is higher than the ambient noise (50 dB) in the open office environment.

Employees can shut themselves off from their surroundings in the Ahrend Cerene and focus on their work. They can also make (video) calls and have meetings in the box without disturbing colleagues.

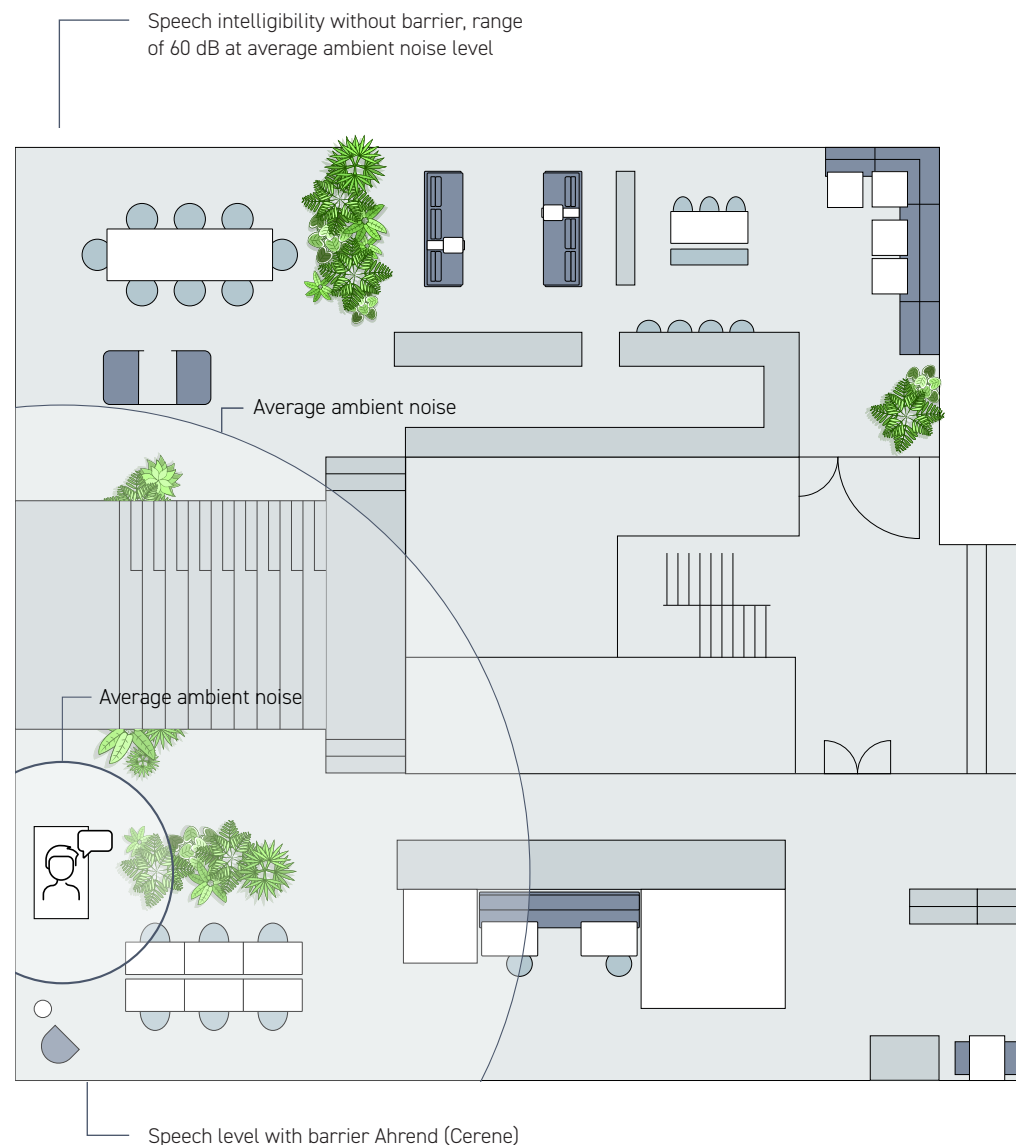

High level of sound insulation

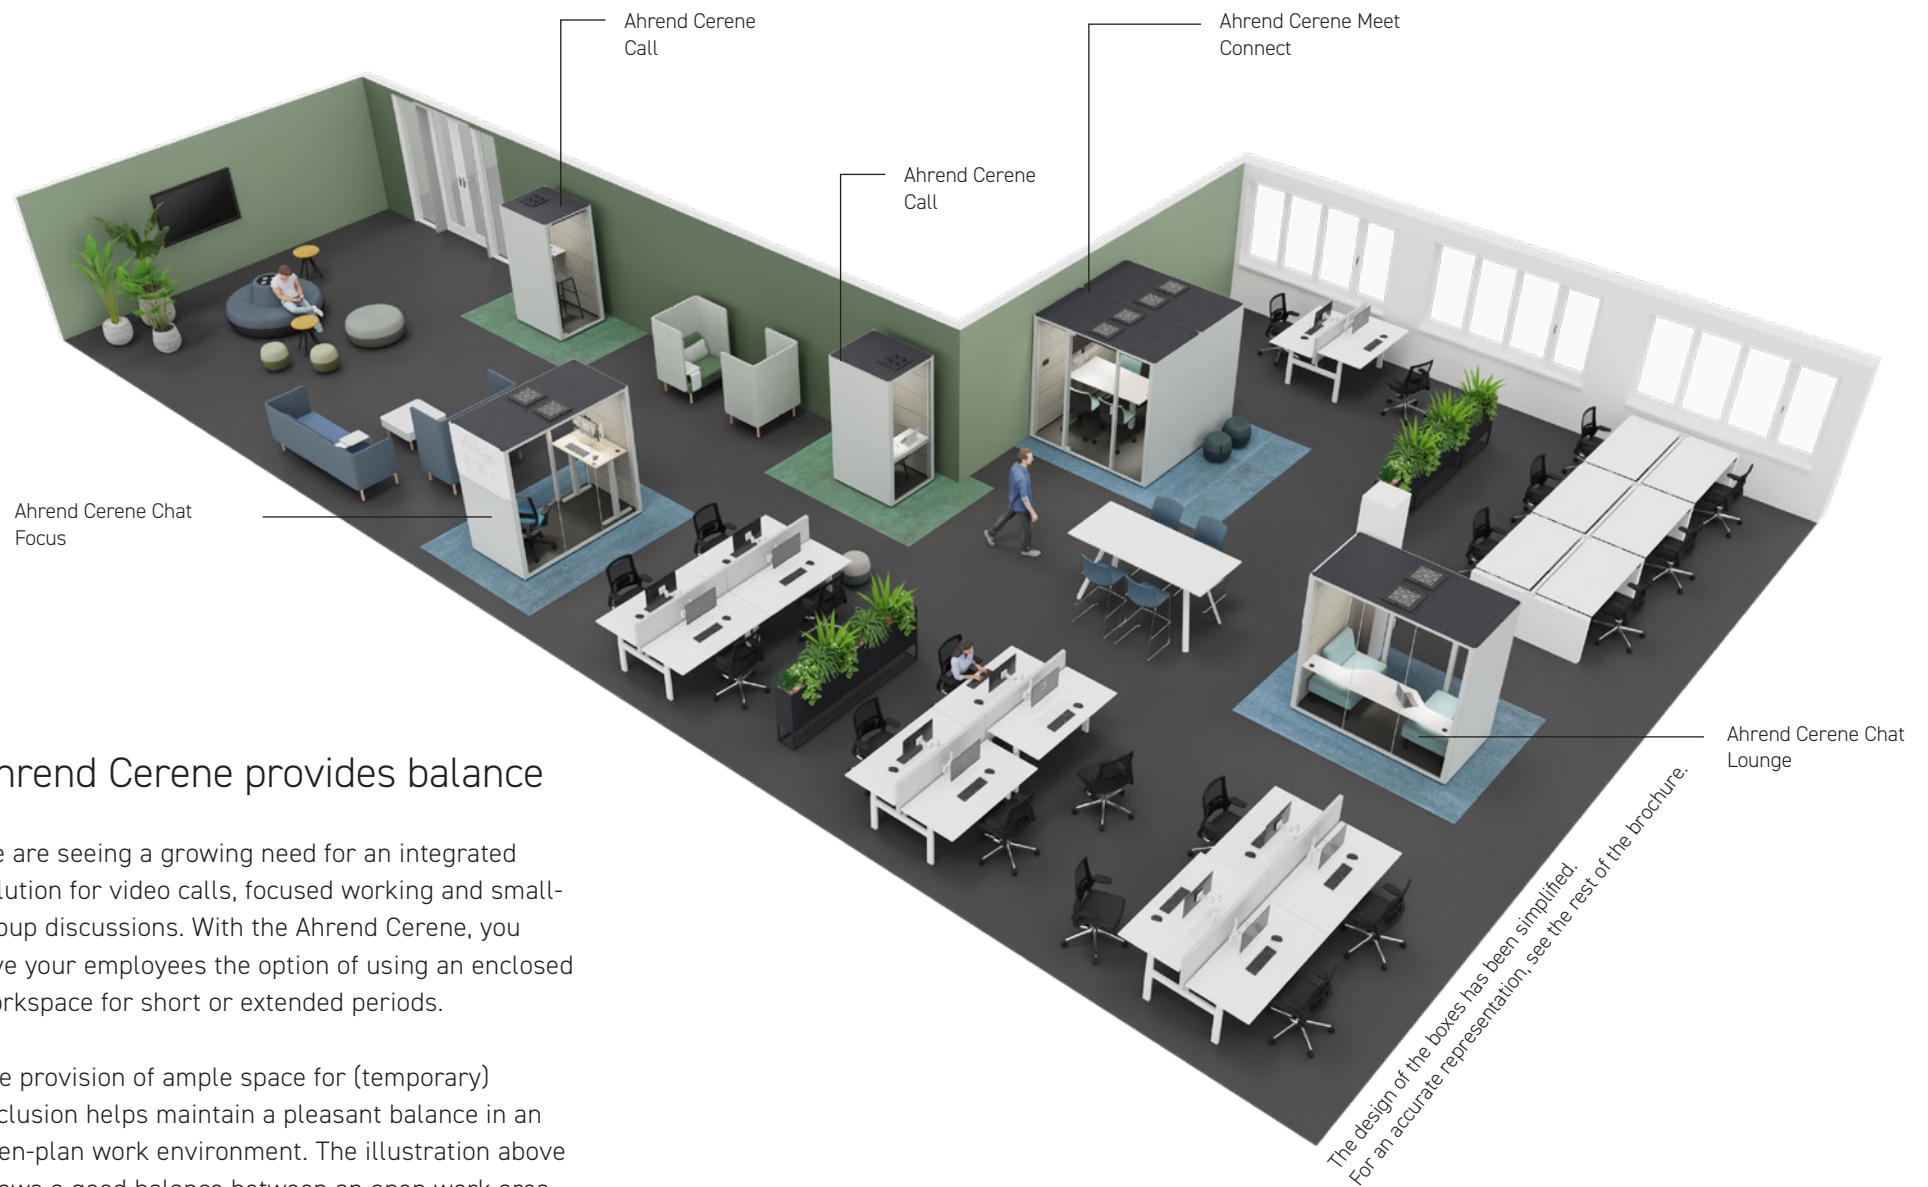

By placing a barrier around the noise, you reduce the speech intelligibility ('noise') of the environment. How much reduction is needed to achieve the desired result is made measurable with the ISO 23351 standard.

With Class A certification according to the ISO 23351-1:2020 standard, this box offers excellent speech reduction, making conversations inside the box inaudible to the surroundings and also ensuring optimal privacy.

In addition, the interior of the Ahrend Cerene Collection is fitted with upholstered panels. These prevent echo in the interior space, so that you can hold a pleasant conversation inside the box.

The Ahrend Cerene is not only well insulated against noise on the inside, the outside also contributes to pleasant acoustics. For example, the upholstered outer walls reduce reverberation times, improving the acoustic climate in the environment itself. By reducing reverberation times and absorbing sound effectively, a more pleasant and productive working environment is created.

Ahrend Cerene provides balance

We are seeing a growing need for an integrated solution for video calls, focused working and small-group discussions. With the Ahrend Cerene, you give your employees the option of using an enclosed workspace for short or extended periods.

The provision of ample space for (temporary) seclusion helps maintain a pleasant balance in an open-plan work environment. The illustration above shows a good balance between an open work area and enclosed boxes. This works out at 1 box for every 5 employees.

05

Flexibility

The Ahrend Cerene Chat, Meet and Meet XL are modular in structure. They are easy to expand if necessary, for example if the office layout is rearranged or if the number of employees in the workplace increases.

The interiors of the boxes can be adapted to suit the intended activity, thanks to their modular structure. If the need arises in the future, the layout is easily rearranged; for example from an individual workstation to a duo lounge setting, or from a meeting arrangement to a brainstorm setting.

The Ahrend Cerene Collection encourages an active working posture, as you can choose between sitting or standing. This keeps you moving. This makes the boxes ergonomic workstations that support vital and comfortable working.

You can easily attach various accessories to the inside wall of the box, such as a whiteboard, monitor bracket or coat hook. A wall shelf, available in two sizes, can also be attached to the wall. This way you can adjust the box to your wishes. Wheels allow the box to be moved easily, if the layout of the office environment is rearranged, for example.

The design of the boxes has been simplified.
For an accurate representation, see the rest of the brochure.

06

Sustainability

The Ahrend Cerene Collection has been designed to change with the times, making it a sustainable solution. The collection is constructed in such a way that all its components are easy to upgrade or to replace. Furthermore, the interior of the box can be easily adapted to suit changing needs; right where it stands.

All the fastenings are detachable, so that modules and materials are easy to separate, and can be reused within the collection or by our Circular Hub. This avoids wasting materials.

The collection is designed to provide optimum acoustic performance at the lowest possible weight. The lightweight construction has been designed with high material efficiency, which contributes to lower CO₂ emissions, while maintaining the highest level of acoustic performance.

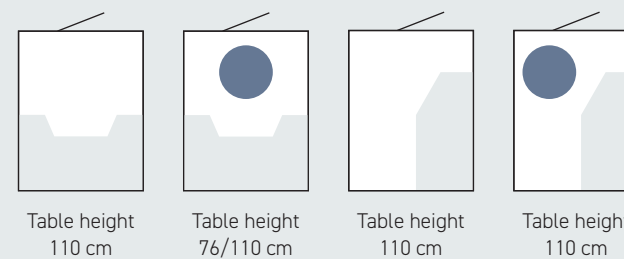

The design of the box has been simplified.
For an accurate representation, see the rest of the brochure.

07 Cerene Call

Ahrend Cerene Call is the ideal place to focus on a phone or video call. This box lets you create space for silence in an (open) work environment.

- › There is sufficient space inside for an Ahrend Well chair or Ahrend Swaye stool; you can comfortably use the box for a longer period of time.
- › Ahrend Cerene Call provides a flexible work environment with no major changes needed. Thanks to its compact dimensions, the box fits in anywhere.

08

Cerene Chat

Ahrend Cerene Chat is the ideal place to isolate yourself from a noisy workplace for a meeting with colleagues or clients, or to concentrate on your work.

The box is available in a range of configurations. The configuration that suits your organisation best depends on what you primarily wish to use the box for. For example, working, video calling or meeting.

- › Ahrend Cerene Chat provides privacy. Do you need to spend a longer period in the box? If so, the glazing allows you to stay in contact with your surroundings.
- › The box meets changing needs within the work environment: interior changes are straightforward.

Cerene Chat Focus

For concentrated work and (video) calls

Interior:

- › Sit-stand desk and Ahrend Remode office chair
- › Can be complemented with floating bench

Cerene Chat Connect

For uninterrupted collaboration and online meetings

Interior:

- › Ahrend Well conference chairs in combination with a low table (in 2 versions)
- › Or Ahrend Swaye stools in combination with a high table (in 2 versions)

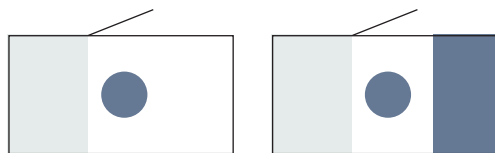

Cerene Chat Lounge

For informal meetings and lounging

Interior:

- › Floating benches (with optional shoulder rest) in combination with a low table (in 2 versions)

Sit-stand desk 68-118cm

Table height 76/110 cm

Table height 76 cm

09

Cerene Meet

Ahrend Cerene Meet is particularly suitable for undisturbed meetings, video calls, brainstorming and collaborating in small groups of up to four. The box is available in different configurations. The configuration that suits you best depends on the activity for which the box is used.

- › The various configurations, as well as the option of sitting or standing, make the Cerene Meet ideal for a wide range of activities.
- › Ahrend Cerene Meet meets changing needs within the work environment: interior modifications are straightforward.

Cerene Meet Gather

For undisturbed meetings

Interior:

- › Ahrend Well conference chairs and/or Ahrend Assist poufs in combination with a low table
- › Or Ahrend Swaye stools in combination with a high table

Cerene Meet Connect

For uninterrupted collaboration and online meetings

Interior:

- › Ahrend Well conference chairs in combination with a low table
- › Or Ahrend Swaye stools combined with a high table

Cerene Meet Brainstorm

For brainstorming sessions and stand-ups

Interior:

- › Ahrend Well conference chairs in combination with a low table
- › Or Ahrend Swaye stools in combination with a high table
- › Electrification module on glass wall

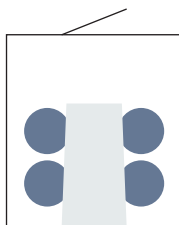

Table height 76/110 cm

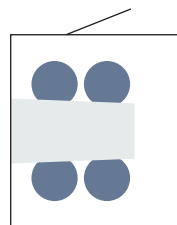

Table height 76/110 cm

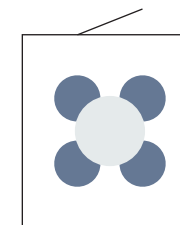

Table height 76/110 cm

Cerene Meet Lounge

For informal meetings and lounging

Interior:

- › Ahrend Charge or floating benches (with optional shoulder rest) combined with a low table
- › Ahrend Assist pouffes can be added

Cerene Meet Present

For uninterrupted presenting

Interior:

- › Ahrend Charge or floating benches (with optional shoulder and/or arm rest)
- › Monitor frame for a 43-inch screen

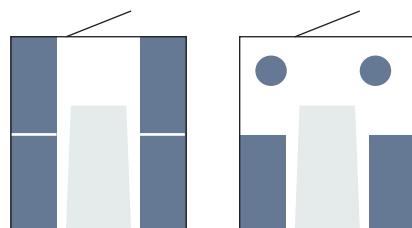

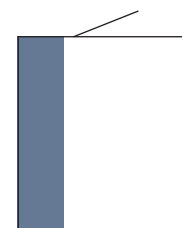

Table height 76 cm

Without table

10

Cerene Meet XL

Ahrend Cerene Meet XL, like the Ahrend Cerene Meet, lends itself well to undisturbed meetings, video calls, brainstorming and collaboration. This larger variant is suitable for groups of up to six people. This box is also available in different configurations to suit different activities.

- › The different configurations and the choice of working sitting or standing make the Ahrend Cerene Meet XL suitable for many different activities.
- › The Ahrend Cerene Meet XL meets changing needs within the working environment; the interior is easy to adapt.

Cerene Meet XL Gather

For undisturbed meetings

Interior:

- › Ahrend Well conference chairs and/or Ahrend Assist poufs in combination with a low table
- › Or Ahrend Swaye stools in combination with a high table

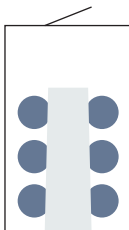

Table height 76/110 cm

Cerene Meet XL Connect

For uninterrupted collaboration and online meetings

Interior:

- › Ahrend Well conference chairs in combination with low table
- › Or Ahrend Swaye stools combined with a high table

Table height 76/110 cm

Cerene Meet XL Brainstorm

For brainstorming sessions and stand-ups

Interior:

- › Ahrend Well conference chairs in combination with a low table
- › Or Ahrend Swaye stools in combination with a high table
- › Electrification module on glass wall

Table height 76/110 cm

Cerene Meet XL Lounge

For informal meetings and lounging

Interior:

- › Ahrend Charge or floating benches (with optional shoulder rest) combined with a low table
- › Ahrend Assist pouffes can be added

Cerene Meet XL Present

For uninterrupted presenting

Interior:

- › Ahrend Charge or floating benches (with optional shoulder and/or arm rest)
- › Monitor frame for a 55-inch screen

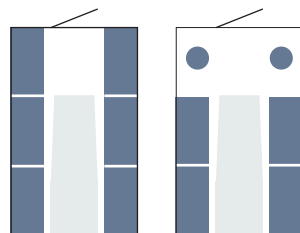

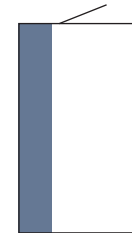

Table height 76 cm

Without table

11

Specifications

The Ahrend Cerene Collection provides a comfortable and functional space for undisturbed calls, video calls and concentrated work. Standard boxes comes with handy accessories, and various options are available to customise the Ahrend Cerene to your needs.

Standard accessories

The boxes are equipped with a motion sensor and control panel for automatic and effortless control of light and ventilation. The occupancy indicator shows the availability of the box. Power sockets and USB chargers are available for charging your devices. The magnetic closing door ensures a silent closure, allowing you to work undisturbed. A coat hook keeps your workspace tidy. The integrated wheels make the box easy to move.

Options

To fully tailor the Ahrend Cerene to your specific needs, we offer a range of options. Monitor frames, arms and holders ensure the perfect screen arrangement. Interior whiteboards are ideal for notes and brainstorming sessions. Privacy glass offers extra privacy and style. Wall shelves offer extra storage space. The Smart PuK charges your devices and gives you insight into workplace occupancy.

With these smart and functional accessories, you transform the Ahrend Cerene into an ideal workplace that perfectly suits your needs and working style.

Materialisation

The exterior and details of the boxes are finished in anthracite textured paint. On the inside, the Ahrend Cerene features light grey upholstered wall panels. The tabletops come in five attractive shades.

The rounded outer walls can be finished in no less than 40 types of upholstery in various colours, so that the box fits any interior. They can also be fitted with an acoustic panel with oak slats. There is also the option of personalising the exterior wall with, for example, an art print, PET felt, moss wall or XL whiteboard.

The horizontal aluminium lining at the top and bottom of the box comes in natural or anthracite oak colour. The door handle is finished in natural or anthracite stained solid oak.

13 Designer Basten Leijh

Basten Leijh has worked for Ahrend since 2010 as an independent designer of soft seating and acoustic and space-in-space solutions. Like Ahrend, he focuses on high-quality circular designs that last. 'We only have one planet and we have to be careful with it,' he says.

Leijh studied at the Design Academy Eindhoven where he managed to get his graduation design - a bicycle - into the product portfolio of international bicycle company *Giant*. After his studies, he started as product and concept developer, partner and creative director at leading companies. Bicycle design was followed by numerous award-winning designs for furniture, cubicals and lighting for the global market.

What characterises his designs? Clean lines with a soft touch. Something that is also well reflected in the Ahrend Cerene Collection. Rounded corners and soft materials give this stylish acoustic box a sleek yet cuddly look. 'Trends from living are making working environments increasingly friendly and human. Applying soft materials on the inside and outside of Ahrend Cerene gives the working environment a nice atmosphere. That feels good. And by using sound-absorbing materials, it also sounds good.'

Other designs by Basten Leijh: Ahrend Charge, Ahrend Recharge, Ahrend Concentration Corner and Ahrend Loungescape.
